

ATTENTION TOY LOVERS:

Denver, CO - Toy-Gear is pleased to announce Action Figure Collector Trays, an innovative display and storage system for loose action figure collections. The goal was simple: design and produce a universal display and storage system compatible with a wide range of action figure lines. The key to our product are the factory cut trays with different sized compartments purpose built for various figure sizes. Our most popular 12 Compartment Trays are made for most 4 inch figures. However, not to be left out, we also offer 4 Compartment Trays for 7 inch figures, 8 Compartment Trays for 6 inch figures and 24 Compartment Trays for 3 inch figures.

These trays are made of a durable very high quality extremely long life XPLE material (similar to a quality yoga mat). For display, the trays can be mounted to a wall or they can rest on a regular acrylic book stand. For storage, up to 4 standard trays can be housed in an ordinary office archive box. They provide excellent protection and are very easy to get to. They are also ideal for loose figure retailers or sellers at toy shows.

We are coming off a successful Kickstarter and would love to count on your support going forward with our e-store. We are available for podcasts and any other interview formats and can provide exclusive pics and video of the trays in action. We will be attending upcoming local toy events in our area to give collectors and retailers a like a chance to have a hands experience with our collector trays. We will be offering tray samples for news/review sites that are interested.

**Prototype...**

Our first 3D CAD renders of various angles of the Action Figure Tray prototype.

**For Display...**

Our trays make a great way to display your figures either mounted on a wall or resting on an acrylic book stand.

**For Storage...**

Our trays transform an ordinary standard office archive box into a purpose built high quality storage solution
